Chemistry Graduate Studies
Master of Science in Pharmaceutical Chemistry

Department of Chemistry and Environmental Science
College of Science and Liberal Arts
ABOUT THE COLLEGE OF SCIENCE AND LIBERAL ARTS
The College of Science and Liberal Arts (CSLA) is dedicated to instruction in the physical, biological, and mathematical sciences as well as traditional liberal arts disciplines. CSLA is home to internationally renowned research centers and award winning researchers, and partners with departments throughout NJIT to explore emerging frontiers and expand interdisciplinary initiatives in a diverse range of areas that include genomics, neuroscience, ecology, biomechanics, solar physics, photonics, environmental science, applied mathematics and statistics, materials science, technical communication and digital media.

WHY STUDY PHARMACEUTICAL CHEMISTRY AT NJIT?
NJIT is uniquely situated among the greatest concentration of biotechnology and pharmaceutical activities in the world, with over 400 private and public biopharmaceutical companies thriving around the NJ Area. Opportunity is right outside our door. Students in the M.S. in Pharmaceutical Chemistry program train in quantitative methods that prepare them for careers in the health sciences and pharmaceutical industry. This program emphasizes the applied science and molecular level basis of drug design and analysis.

WHO SHOULD ENROLL?
If you have a BS degree in the chemical or biological sciences or engineering and seek a career or are employed in the pharmaceutical industry, this program is for you.

ADMISSIONS REQUIREMENTS
GRE for all full-time applicants
Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) for all international students not holding a degree from a U.S. postsecondary institution. Minimum scores: Internet-based TOEFL – 79, computer-based TOEFL – 213, paper-based TOEFL – 550, IELTS – 6.5 with no sub-score lower than 6.0.

CURRICULUM
The MS in Pharmaceutical Chemistry program consists of five core (required) courses and three elective courses, for a total of 30 credits. For degree requirements consult the graduate catalog. [catalog.njit.edu/graduate]

CORE COURSES (15 CREDIT HOURS)
CHEM 605 Advanced Organic Chemistry I: Structure
CHEM 673 Biochemistry
CHEM 777 Principles of Pharmaceutical Chemistry
CHEM 714 Pharmaceutical Analysis
PHEN 601 Principles of Pharmaceutical Engineering

ELECTIVE COURSES (3 CREDIT HOURS)
CHEM 661 Instrumental Analysis Laboratory
CHEM 716 Drug Development and Discovery
CHEM 719 Drug Delivery Systems
CHEM 737 Applications of Computational Chemistry
CHEM 610 Advanced Inorganic Chemistry
CHEM 658 Advanced Physical Chemistry
CHEM 748 Nanomaterials
EVSC 616 Toxicology for Engineers and Scientists
MATH 663 Introduction to Biostatistics
MATH 664 Methods for Statistical Consulting
PHEN 500 Pharmaceutical Engineering
PHEN 604 Validation and Regulatory Issues
PHEN 618 Principles of Pharmacokinetics
ME 635 Computer-Aided Design
CHEM 590 Co-op opportunity
